

FROM TECH TRANSFORMATION TO ORGANIZATIONAL AGILITY

OPERATIONAL EXCELLENCE & BUSINESS TRANSFORMATION

World Summit

“Empowering professionals with the emerging trends in technology, business processes, and winning strategies.”

1st-3rd of November · 2023
Miami · FLORIDA

CONFERENCE OVERVIEW

From Frederick Taylor's **Principles on Scientific Management** in the early 20th century to Jim Collins' **Good to Great** in the early 21st century, ideas on improving **Operational Excellence** have been evolving relentlessly. Both theories (such as Lean and Six Sigma) and technologies (such as Digital and AI) have got a lot to offer to every industry and can increase the overall value of organizations.

The only thing that hasn't changed over the last century is the continuous improvement in Operational Excellence, and we aren't going to see an end to it anytime soon. From positive changes in performance, empowering employees, and maintaining customer satisfaction, to eliminating waste and reducing risk, all the while meeting deadlines and completing deliveries on time, we have a lot of ground to cover.

So why hasn't Operational Excellence become more widespread yet?

This Keynotion Event will provide you with a platform to learn from world-leading brands through a comprehensive blend of practical, real-world case studies, inspiring international keynote presentations, panel discussions, networking breakout sessions, and more. If you wish to stay competitive, you need to be here.
